

ENGINEERING CAREERS TALK SERIES

November 16, 2022 • 5PM CST

Attend online or on-campus

cs.lewisu.edu/ece

LEWIS
UNIVERSITY

On-campus Location: AS-102A (Building 12 on the campus map)

Zoom Link: <https://lewisu-edu.zoom.us/j/87313555735>

DEPARTMENT OF ENGINEERING, COMPUTING AND MATHEMATICAL SCIENCES (ECAMS)

Interested in an engineering major or currently pursuing an engineering degree? Come meet and speak with professional engineers from various engineering fields and learn about their careers, their journey and what being an engineer is all about.

GUEST SPEAKERS

Stefan Micic

Stefan is a senior New Product Development **electrical engineer** with G&W Electric Company. He earned his **B.Sc. and M.Sc. degrees from the University of Belgrade, Serbia.** Throughout his career with G&W, Stefan has held progressively responsible positions within the NPD team, including leading an international team of engineers and focusing on the development of underground and overhead switchgear systems. He has submitted and presented on multiple papers at international conferences (CIRED) and is a co-inventor for a patent for high voltage measurement systems.

Dan Zapotoczny

Dan is currently a **Software Engineer** on the F/A-18 mission systems program at Boeing, where he supports the design, implementation, and testing of software on the Sensors & Data Fusion ART. He previously worked as a Data Acquisition/Test Instrumentation & Controls Engineer co-op at CNH Industrial where he supported data acquisition on driveline tests of various tractor models. He was also a Reliability Analysis intern at ComEd where he supported data scientists with collecting and cleaning data on underground residential distribution cables. Dan received his **B.S. in Computer Engineering & Computer Science** as well as his **M.S. in Computer Science**, both from Lewis University.

Guest speakers will answer your questions such as:

- What made you decide to be an engineer?
- What does a typical day look like in an engineering job?
- What skills should I focus on developing to be a successful engineer?

Karolina Krzak

Karolina Krzak is currently a **Project Engineer** at J. A. Watts, Inc., a woman-owned, certified DBE that provides owner's representation, program management and construction management for public and private owners across the country. As a project engineer at J.W.I., Karolina coordinates and acts as owner's representative for all aspects and phases of multiple projects for complex, long-term programs. Karolina earned her **B.S. in Computer Engineering** from Lewis University.

Contact Dr. Gina Martinez (martingi@lewisu.edu) for questions.
